--------------------	------------------------------

Machine Learning	scikit-learn, Tensorflow
------------------	--------------------------

Databases	MongoDB, MySQL
-----------	----------------

Numerical Libraries	Numpy, Pandas, Matplotlib
---------------------	---------------------------

LANGUAGES

English, Hindi

PROJECTS

Portfolio — AI based Website

This is my personal portfolio website which tells about my skills and prior experience. It uses a chatbot which chats on my behalf with the users to answer and register their queries. The chatbot was created as a separate project and integrated in this using Python and Django.

Link: <https://ankit-gupta-1511.github.io/new-portfolio/>

HTML5, CSS3, Bootstrap 4, JavaScript(ES6), JQuery, Python, Django, Tensorflow

Chatbot — AI based Chatbot uses NLP

This is a chatbot trained from data collected from GitHub and my own data. It leverages Natural Language Processing to stem words and create a Bag of Words representation to train a Deep Neural network using supervised learning.

Link: <https://github.com/Ankit-Gupta-1511/my-chatbot>

Python, Numpy, Pandas, Tensorflow, Tflern, NLTK

TechBlog — Blogging Website

This site was built with the purpose of sharing information. It is powered by NodeJS and MongoDB in the Backend.

HTML5, CSS3, Bootstrap 4, JavaScript(ES6), JQuery, Node.js

Fashvolt — E-commerce Website

This site was built as a freelancing project for a young company. The site uses a CMS built on top of Django in Python environment.

HTML5, CSS3, Bootstrap 3, JavaScript(ES6), JQuery, Python, Django

RedCarpetUp — Company Website

This site was built during Summer Internship in 2017 in Redcarpet Tech Pvt Ltd. This site uses Hugo to serve static files.

Link: <https://www.redcarpetup.com/>

HTML5, CSS3, Bootstrap 3, JavaScript(ES5), JQuery, Hugo

Tools

Operating System	Ubuntu16.04.4, Windows 10
Code Editor	Jupyter Notebook, Spyder, VSCode
Version Control	Git
